

DEV :02

BUG TRACKING SYSTEM

We have a series of pages linked to each other, namely:

- Homepage
- Login page/Sign up page
- Dashboard(logged in)
- My bugs page which consists of a Live discussion forum inset with the current date and time
- Assigned bugs page
- Raise a bug page

Technologies Used:

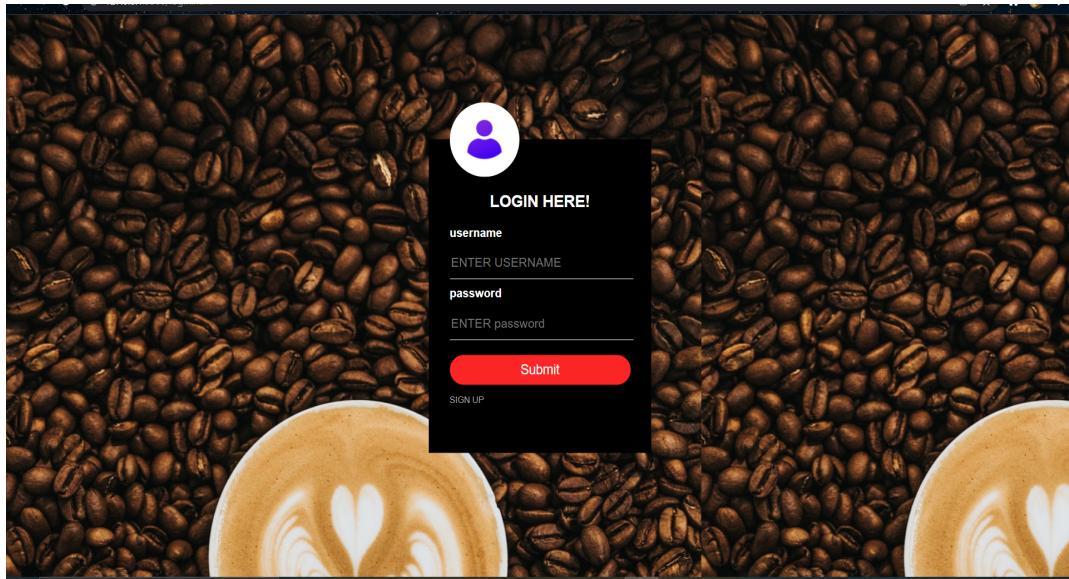

1. HTML
2. CSS
3. JAVASCRIPT
4. DJANGO
5. PYTHON

FEATURES:

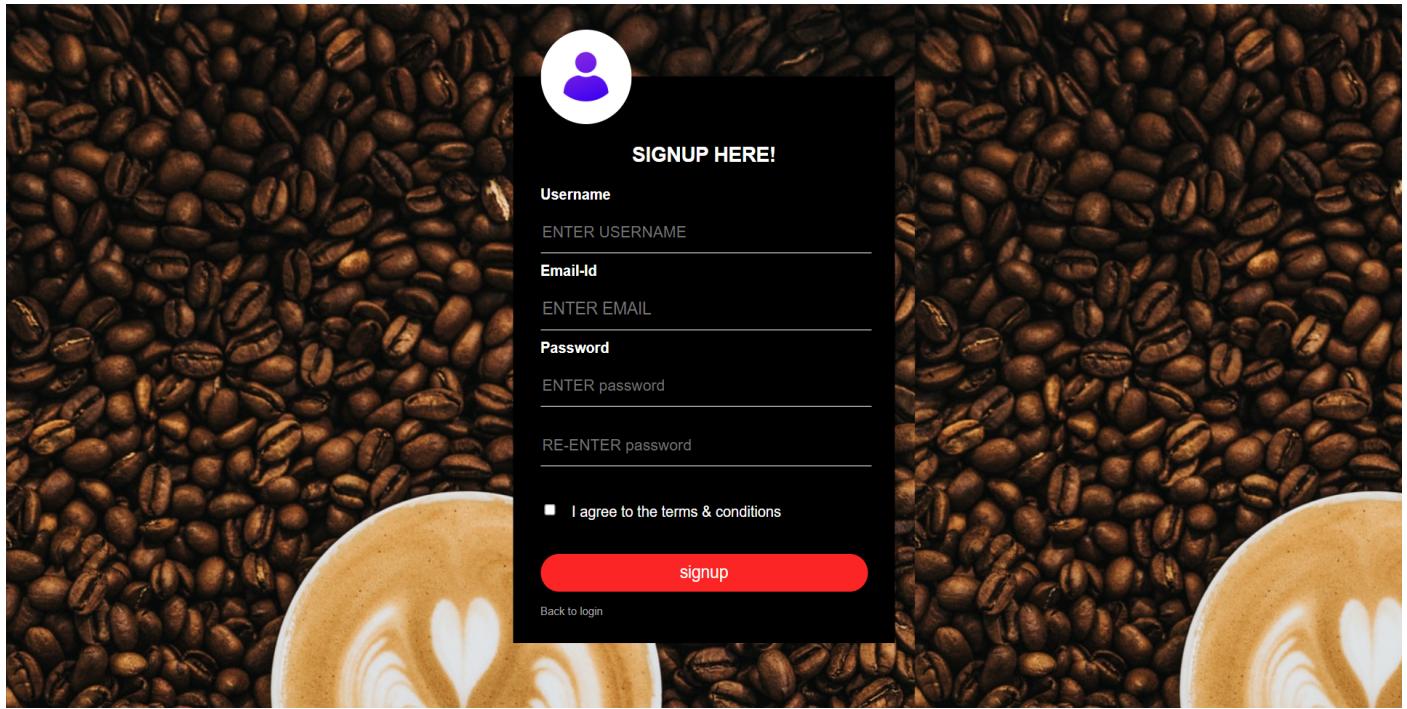

- ❖ The Manager creates a team and assigns them bugs based on their role.
- ❖ The Non-users can access only some bugs while the users and team members have a vivid range of bugs to access.
- ❖ The users and team members are directed to the Dashboard via the secure login/sign-up page.
- ❖ The Dashboard contains the bugs raised by the user.
- ❖ Clicking on the bug leads to the discussion forum, where the user can discuss the issues related to the bug.
- ❖ If a user wants to raise a bug, he/she can raise it by clicking on the Raise a bug button and filling up the required bug description in it.
- ❖ There is also the provision of remote access to the different elements of the website through a secure navbar.
- ❖ The ability to delete and close an open bug.

- ❖ An employee of the organization can view what all bugs are assigned to them using the Assigned Bugs page.
- ❖ Discussion forum.

LOGIN PAGE:

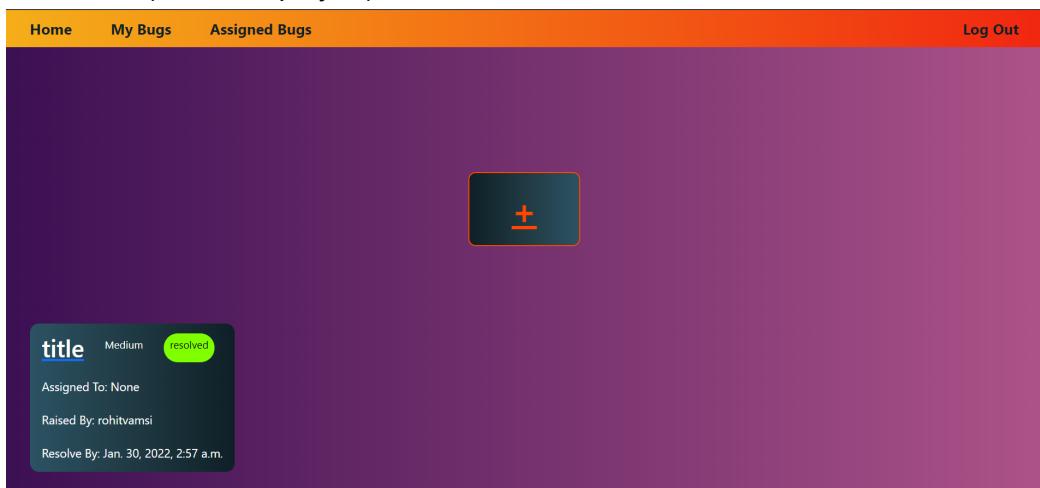

SIGNUP PAGE:

Raise a bug page:

A purple-themed "Raise a Bug" form page. The top navigation bar includes "Home", "My Bugs", and "Log Out". The main form area has a yellow-to-orange gradient background and is titled "Raise a Bug". It contains a "Title:" input field, a large empty text area for "Description:", and a red "Raise the error" button at the bottom.

Dashboard(for an employee):
